

**Welcome
to the**

OCTANE

Update
Version 2.21

OCTANE UPDATE 2.21 FEATURES

- **Fixes headset issues with 2.20 update**

OCTANE UPDATE 2.20 FEATURES

- **Fixes Sync Issue caused by June 20, 2012 Microsoft Xbox Dashboard Update**

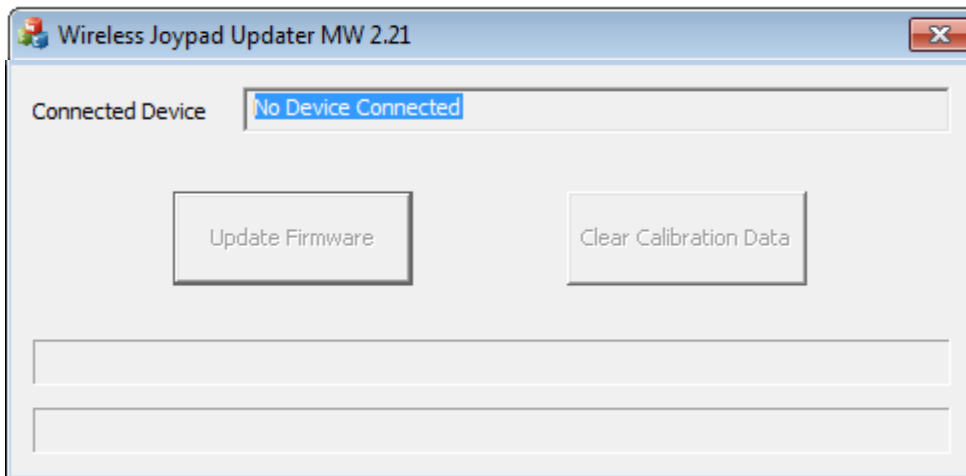

OCTANE UPDATE 2.19 FEATURES

- **Increased Rapid Fire rates for most weapons**
- **Increased Rapid Fire consistency – less glitches and weapon freezing**
- **The full range of 0 – 99 shots per second is now possible providing maximum damage**
- **Rapid Fire is more compatible than ever and now works with GTAIV**
- **Re-calibrates both analog sticks eliminating the “slow turn” effect and providing precise accurate aiming and movement**
- **Improved battery life usage indication**

****System Requirements: The Octane update requires a Windows PC with XP or higher Operating System****

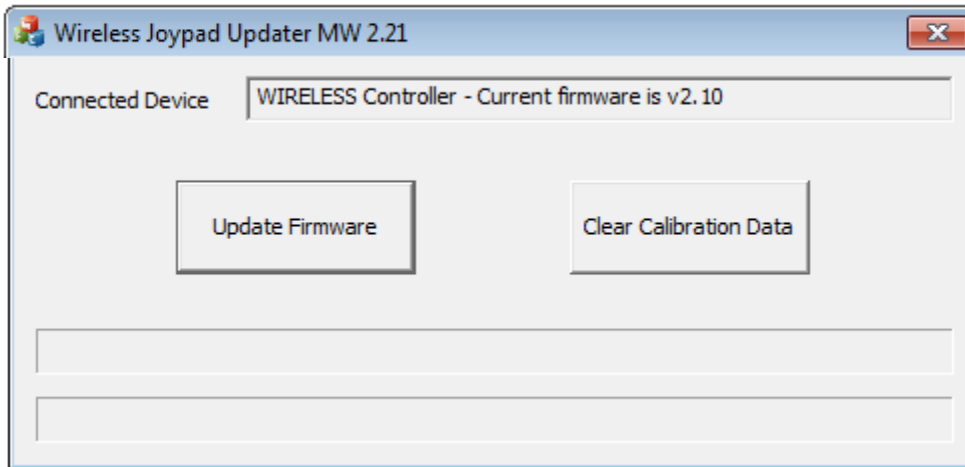

Installing the UPDATE:

1. Once the Octane update has been downloaded, UNZIP to your desktop or a folder of your choice
2. Double Click on WirelessJoypadUpdater_MW_221.exe
3. The following window will appear:

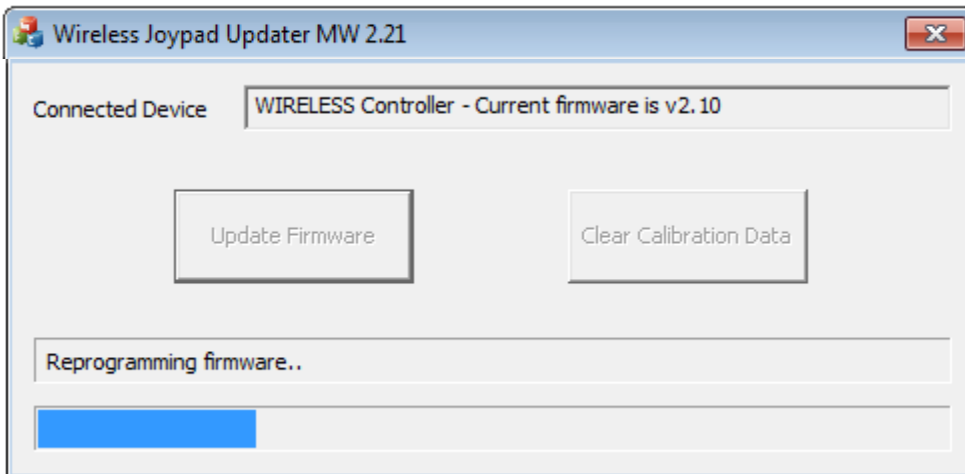

4. Insert a standard USB 2.0 cable into your Windows PC and into your Mindforce X360 controller.

5. The window will now reflect that your controller is connected:

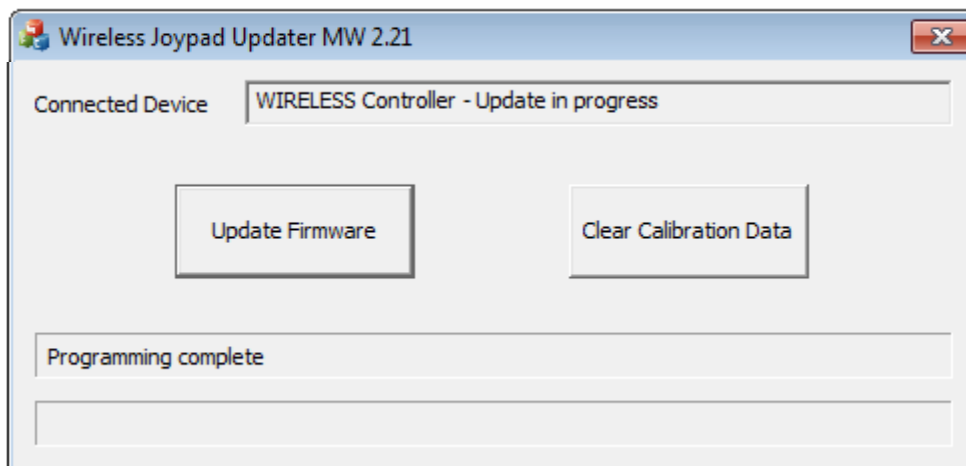

6. Click "Update Firmware"

7. The Window will show a progress bar as per below until the update is complete.

8. When complete simply unplug the USB cable from your controller.

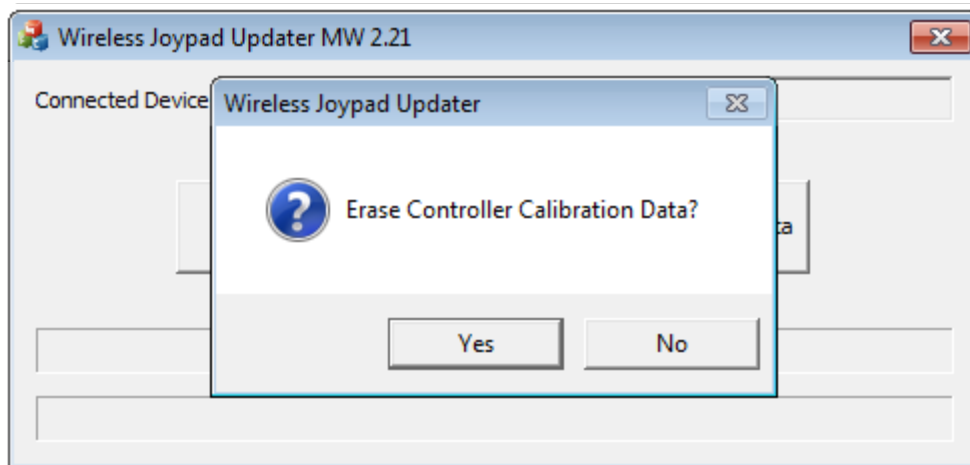

9. Enjoy the update and please provide feedback at support@collectiveminds.ca

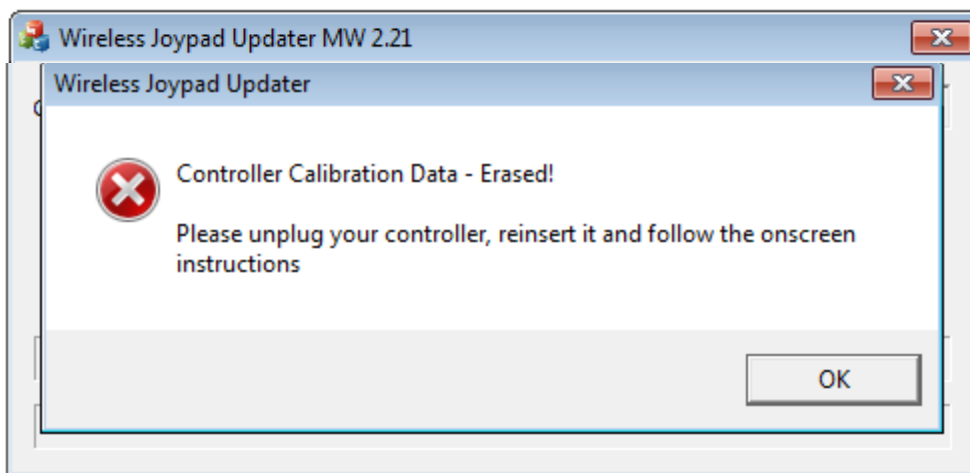

****If there are any issues with the update follow the following steps****

10. Click on “Clear Calibration Data”

11. The window will appear as below:

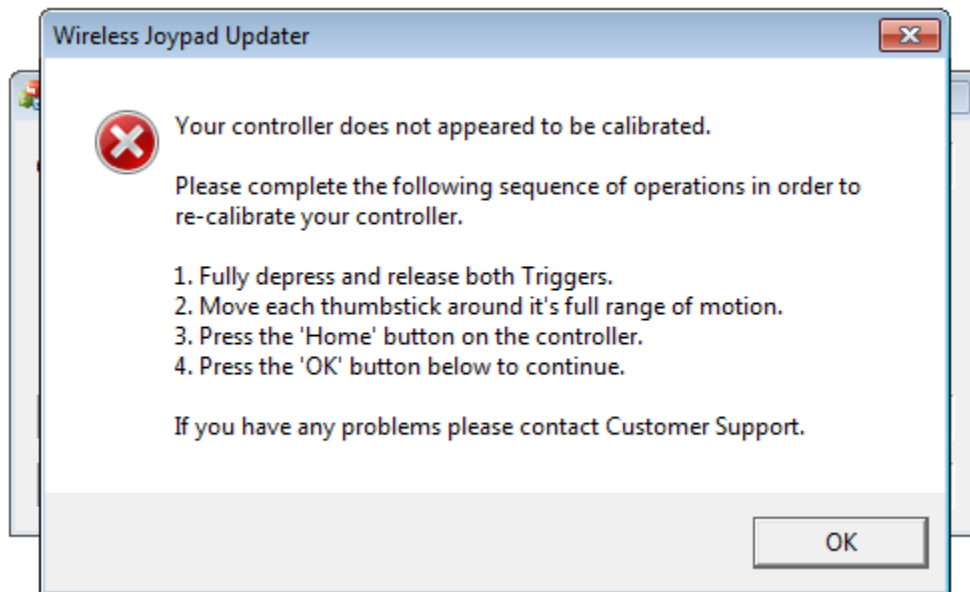

12. Click “YES” and the following window will be displayed:

13. Unplug the USB cable from the controller. Now plug back in the USB cable into the controller and click "OK"

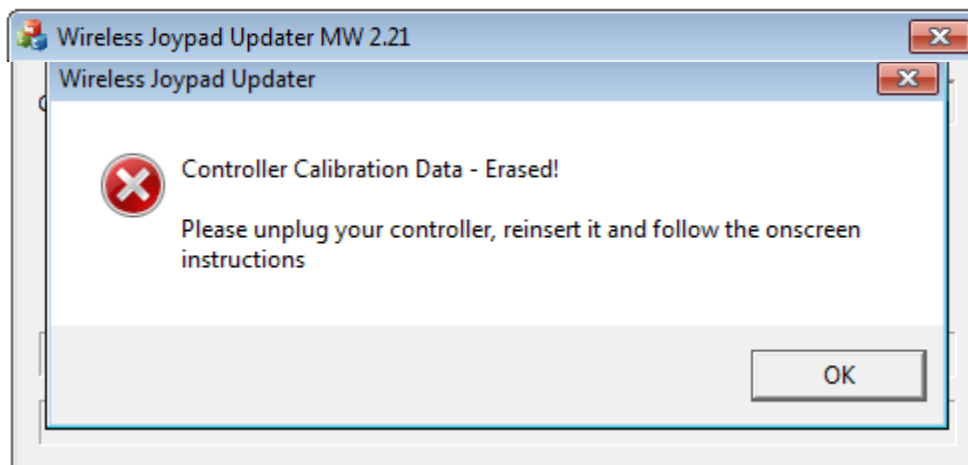

14. The following window will be displayed:

15. Follow the instructions exactly as outlined.

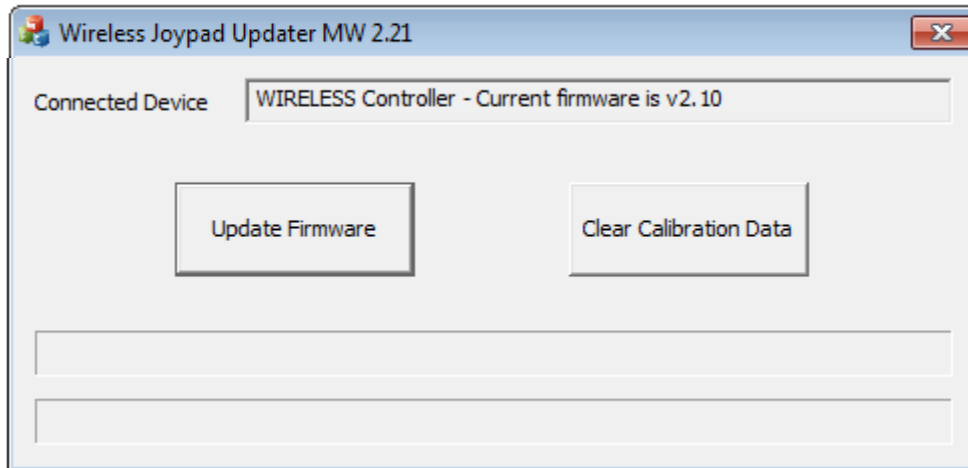

16. Click "OK"

17. The following window will be displayed:

18. Click "OK"

19. The following window will be displayed:

20. Go back and repeat from Step 6.

21. Enjoy the update and please provide feedback at support@collectiveminds.ca
